	Migrating to SUSE LINUX Self-Study Workbook	
	Introduction	þIntro-1
	SLES 9 Server Setup Instructions	þIntro-2
	Access the SLES 9 Server as a VMware Server	Intro-2
	Install the SLES 9 Student Server With AutoYaST	Intro-8
	Scenario	þIntro-8
SECTION 1	Install SLES 9	
	Exercise 1-1 Install SLES 9 from CD.	1-2
	Exercise 1-2 Configure the SLES 9 VMware Server	1-12
SECTION 2	Understand YaST	
	Exercise 2-1 Update Your SLES 9 Server Using YOU	2-1
	Exercise 2-2 Get Familiar with YaST.	2-4
	Exercise 2-3 Install Software Using YaST.	2-5
	Exercise 2-4 Change the Language Setting with YaST	2-6
	Exercise 2-5 Change the Keyboard Layout with YaST	2-7
SECTION 3	Understand SuSEconfig	
	Exercise 3-1 Use the YaST /etc/sysconfig Editor Module	3-1
	Exercise 3-2 Use SuSEconfig to Check and Set File Permissions	3-3
SECTION 4	Configure the Network	
	Exercise 4-1 Configure Network with YaST	4-1
SECTION 5	Work with File Systems	
	Exercise 5-1 Use YaST to Administer LVM	5-1
	Exercise 5-2 Understand submount	5-3
SECTION 6	Manage User Accounts	
	Exercise 6-1 Use the SLES 9 OpenLDAP Server	6-1

	Exercise 6-2 Change Security Settings Using YaST	6-6
	Exercise 6-3 Manage User Accounts with YaST	6-8
	Exercise 6-4 Use Files in /etc/skel/.	6-9
	Exercise 6-5 Use ACLs to Change File Permissions	6-10
SECTION 7	Understand the Startup Mechanism	
	Exercise 7-1 Manage Runlevels with YaST.	7-1
	Exercise 7-2 Create a Startup Script for icmpinfo	7-2
SECTION 8	Configure Services on SLES 9	
	Exercise 8-1 Add a Module to Apache2.	8-1
	Exercise 8-2 Run the YaST HTTP Server Module.	8-4
SECTION 9	Monitor the System	
	Exercise 9-1 Perform Typical Accounting and Monitoring Tasks.	9-1
	Exercise 9-2 Get I/O and Process Related Statistics.	9-2
SECTION 10	Configure Kernel Parameters	
	Exercise 10-1 Change Kernel Parameters with Powertweak	10-1
	Exercise 10-2 Use mkinitrd to Modify the Initial RAM Disk	10-2
SECTION 11	Use the SLES Rescue System	
	Exercise 11-1 Use the SUSE Rescue System	11-1
